## ABOUT ME

I'm a dedicated Full Stack Java Developer with a strong passion for building scalable, high-performance web applications. With hands-on experience in Java, Spring Boot, Hibernate, ReactJS, and cloud technologies, I specialize in developing end-to-end solutions that are both robust and efficient.

## EDUCATION

**2023 - 2025**

Ranchi University

### Master of Computer Applications

Studying advanced software development, web technologies, cloud computing, and full-stack Java development with hands-on project work.

**2020 - 2023**

Ranchi University

### Bachelor of Computer Applications

Learned core programming, databases, and web development fundamentals. Built a strong foundation in Java, OOP, and software design.

## PROJECT

**2025**

Eclipse IDE

### Online Book Shopping Website

A dynamic web application built with Java, Servlet, JSP, and MySQL that allows users to buy and sell books online.

- Admin: Manages books, users, and sales reports
- User: Searches, purchases, and lists old books for sale

**2024**

Eclipse IDE

### Asset Management System

Web-based system developed using Java, Servlet & JSP to manage company resources.

- Admin: Adds and tracks office assets, resolves employee complaints
- User: Views assigned assets and submits complaints for damaged items

**2024**

NetBeans

### Car Rental Management System

A desktop application developed in Java (NetBeans) to automate car rental operations.

- Manages car inventory, customer details, bookings, and billing
- Helps customers find available cars easily and allows owners to track rentals and generate reports

## SKILLS

- Communication
- Teamwork
- Problem Solving
- Collaboration
